Professional Summary

Senior Backend Engineer with 4 years of experience specializing in Java, Spring Boot, and cloud microservices. Demonstrated track record of designing high-throughput REST APIs, optimizing SQL databases, and containerizing systems.

Technical Skills

Languages & Frameworks: Java, Spring Boot, Spring, Hibernate, REST API, Python, SQL
Databases & Caching: PostgreSQL, MySQL, Redis, MongoDB
Cloud & DevOps: Docker, Kubernetes, AWS (EC2, S3, RDS), Git, GitHub Actions, CI/CD, Linux

Professional Experience

Senior Backend Developer | CloudScale Solutions (2022 - Present)

- Architected and deployed scalable microservices using Java and Spring Boot handling 10M+ daily requests.
- Built low-latency REST APIs and integrated Redis caching, reducing API latency by 45%.
- Containerized 12 backend services with Docker and configured automated CI/CD deployments on AWS.
- Optimized complex SQL queries and PostgreSQL database indexing for analytics workloads.

Backend Engineer | TechVentures India (2020 - 2022)

- Developed robust RESTful APIs using Java, Spring, and MySQL.
- Automated testing with JUnit and Git workflows for collaborative team sprints.

Key Projects

1. Enterprise E-Commerce Backend: Built using Java, Spring Boot, MySQL, Redis, and Docker with AWS deployment.
2. Payment Gateway Microservice: Developed secure REST API with JWT authentication and Kafka messaging.

Education

B.Tech in Computer Science and Engineering | National Institute of Technology (2016 - 2020)
